EFFECT OF ELECTRONS ON MULTILAYER FILMS,
tr. by Carlo A. Bauman. [1960] [6]p. 2 refs.
T-2838; M 2542.

Order from LC or SLA mi\$1.80, ph\$1.80 61-15612

Trans. of *Zhurnal Tekhnicheskoy Fiziki (USSR) 1958,
v. 28, no. 4, p. 908-909.

Exposing multilayer color photographic film to electrons of different energies leads to various colorations of the film. The colors formed depend upon electron energies. By changing the electron energy, the principal change occurs in the color of the film. When the exposure time (and intensity) of the beam is changed, then the basic change occurs in the color saturation.
